FILE: Speeches

MEMORANDUM FOR: Chairman, Publications Review Board

THROUGH : Chief, Systems Programming Division
Deputy Director for Processing, ODP
Director of Data Processing
Deputy Director for AdministrationSTAT^{FROM} :
Systems Programming Division, ODP

SUBJECT : Request to Give a Presentation

1. I request permission to give a presentation describing how computer access controls may be applied to different types of systems.

2. When approved, I intend to speak at the SHARE 57 Conference in Chicago, Illinois, during the week of August 23rd. The audience is expected to be comprised of about 400 persons from the United States and Canada representing organizations running similar computer systems.

3. None of the material to be presented is classified or controversial. I will discuss the technical aspects of adapting a well-known computer software package that is used with batch-oriented computing system resources to control access to timesharing systems. The problems that would be encountered during such an effort will be described in detail.

4. I am not under cover and will be identified as an Agency employee. I will also give the standard disclaimer that the views expressed are my own and not necessarily those of the Agency.

MEMORANDUM FOR: Chairman, Publications Review Board

THROUGH : Chief, Systems Programming Division
Deputy Director for Processing, ODP
Director of Data Processing
Deputy Director for Administration

STAT FROM :
Systems Programming Division, ODP

SUBJECT : Request to Give a Presentation

1. I request permission to give a presentation describing the conclusions of a scientific working group that studied a specific set of computing problems.

2. When approved, I intend to speak at the SHARE 57 Conference in Chicago, Illinois, during the week of August 23rd. The audience is expected to be comprised of about 400 persons from the United States and Canada representing organizations running similar computer systems.

3. None of the material to be presented is classified or controversial. I will describe a unified command language that has been proposed for inclusion in computer software systems to be developed later in this decade. This language was defined by the Future Work Flow Management Task Force under the auspices of SHARE, a scientific consortium.

4. I am not under cover and will be identified as an Agency employee. I will also give the standard disclaimer that the views expressed are my own and not necessarily those of the Agency.

THROUGH : Chief, Systems Programming Division
Deputy Director for Processing, ODP
Director of Data Processing
Deputy Director for Administration

STAT FROM : [REDACTED]
Systems Programming Division, ODP

SUBJECT : Request to Participate in a Panel Discussion

1. I request permission to participate in a panel discussion describing Agency experience in solving a particular type of computing problem.

2. When approved, I intend to speak at the SHARE 57 Conference in Chicago, Illinois, during the week of August 23rd. The audience is expected to be comprised of about 400 persons from the United States and Canada representing organizations running similar computer systems.

3. None of the material to be presented is classified or controversial. I will discuss techniques that we have developed to allow users of IBM's VM/CMS timesharing systems to share data. The architecture of our unclassified Gemini database and AIM electronic mail systems will be described in detail.

4. I am not under cover and will be identified as an Agency employee. I will also give the standard disclaimer that the views expressed are my own and not necessarily those of the Agency.
